## EDUCATION

### CMR TECHNICAL CAMPUS

Bachelor of technology in Computer Science and Engineering (AI& ML)

CGPA - 8.43

2020 – present

### SRI CHAITANYA JUNIOR KALASALA

Intermediate (MPC)

Percentage – 88.6

2018 – 2020

## EXPERIENCE

### AI INTERN

June 2021 – Sep 2021

#### Orbit Shifters

- Worked with a team of 5+ highly experienced people
- Built 1 project using computer vision
- Learned how to be an asset to the team and the best practices to develop any software

## PROJECTS

### SortIt : | HTML, CSS, JavaScript

- Created a sorting visualizer that helps to visualize how sorting algorithms are implemented behind the scenes.
- This project includes algorithms like Bubble Sort, Merge Sort, Selection Sort, Insertion Sort and Quick sort.
- This project is highly responsive to ensure good user experience across various devices and screen sizes.

**Live Website :** [Git-Hub link](#)

### MoneyWheels : | MACHINE LEARNING, HTML, CSS

- This is a application that displays the predicted price of a used car based on parameters like car name, year of manufacturing, fuel type, kilometers driven, selling price, and current market price.
- It is a group project.
- **Tools stack:** Kaggle (for importing Dataset), local Xampp Server.

### Portfolio: | HTML, CSS, JavaScript

- Created a cool website that showcases my technical skills and my details
- It is an independent project

**Live Website:** [Git-Hub link](#)
